

**Mr Arindam Chaudhuri**  
**MBBS (Hons), MS, FRCSEd, MSc (Lon), FRCS**  
***Consultant Vascular Surgeon***

Mr. Chaudhuri was appointed consultant vascular surgeon at Bedford Hospital in March 2008. He qualified from the University of Calcutta, India where he was later awarded the Master of Surgery degree. After initial training in the cardiothoracic surgery and advanced laparoscopic units in Leicester, he then went on to specialist training on the Cambridge higher surgical rotation, based at Huntingdon, Peterborough, Norwich and Cambridge.

During that period he also undertook research in arterial structural and flow mechanics, endovascular treatment of aneurysms, and obtained his MSc from the University of London with honours for his thesis. He was also appointed to the post of lecturer in surgery at the Royal Free Hospital in London. After obtaining specialist accreditation, he worked in Perth, Australia, obtaining hands on experience in the endovascular management of peripheral arterial and complex aortic aneurysmal disease before returning to the NHS.

Mr. Chaudhuri tackles a wide spectrum of arterial and venous disease; his interests are in endovascular aneurysm repair, hybrid interventions for peripheral arterial disease, carotid and amputation surgery. He also has an interest in 'mini-open' hernia repairs' and has the largest experience with titanium-coated hernia mesh in the UK. Mr Chaudhuri's series/technical report has been published and presented internationally. His other roles include reviewer for CVIR (Cardiovascular and Interventional Radiology), British Medical Journal and EJVES (European Journal of Vascular & Endovascular Surgery). He is also a medical referee for ASME (American Society of Mechanical Engineers).

In his spare time, Mr. Chaudhuri is a keen squash and cricket player and listens to jazz-fusion, playing a bit of bass guitar when he can.
