

Mr Aasem M Chaudry  
MBBS, FRCS, Dip Urol, FRCS (Urol)  
***Consultant Urological Surgeon***

Mr Aasem M Chaudry graduated from Rawalpindi Medical College, University of Punjab, Pakistan in 1986. He undertook basic surgical training in Pakistan and UK. He passed his Fellowship in general surgery in 1990 and undertook post-fellowship general surgical training in Yorkshire. He then carried on specialist training in urology in Yorkshire and London. This was completed in Institute of Urology London in 1994.

From 1996 to 2006 Mr Chaudry worked as a consultant urologist in tertiary care settings in Pakistan and returned to UK in 2006. Prior to being appointed in Bedford in September 2010, he worked in Churchill Hospital in Oxford, Southmead Hospital in Bristol, Addenbrooke's Hospital in Cambridge and Guy's Hospital in London. He brings with him a rich urological experience. He has remained involved in clinical research throughout his career and has a number of scientific papers and publications to his name.

His areas of special interest are management of stone disease, per-cutaneous renal surgery, prostate disease, lower urinary tract dysfunction and andrology including erectile dysfunction. Mr Chaudry is working towards developing a state of the art stone service at Bedford including percutaneous nephrolithotomy, semi-rigid and flexible uretero-rensoscopy, laser lithotripsy and ESWL (extra corporeal shock wave lithotripsy). In addition the facility for laser treatment for bladder tumours and laser prostatectomies is to be established.

Mr Chaudry holds full membership of British Association of Urological Surgeons, American Urology Association, Endourology Society and Pakistan Association of Urological Surgeons.
