

Incomplete Miscarriage Advice

The doctor has agreed that you may go home with a plan to come back for a scan or blood tests. You should expect to continue to bleed.

You should ring the ward on 01234 792219 to seek advice if:

- You experience very heavy bleeding and have to change your pad every hour or pass large clots.
- You experience severe pain that is not controlled by simple pain relief, i.e. Paracetamol
- Your bleeding starts again after it has stopped.
- Your bleeding becomes offensive smelling and/or you become feverish.

Please remember not to use tampons until after your next normal period.
