

### Cautery with Silver Nitrate

Cautery with silver nitrate is chemical removal of unwanted tissue which will not reform, or it may be used to seal tiny blood vessels.

#### Advice

- Following treatment you should feel no discomfort.
- Expect to have a dark brownish discharge for several days.
- Do not have sexual intercourse while you have the discharge.
- You may bath and shower as normal.
- If you have a period within two weeks of treatment, do not use tampons.

If you have any concerns following treatment please contact your GP or Gynae Clinic on 01234 792007
