

Breast surgery patients: useful things to bring to hospital

1. Prescribed tablets/medicines you routinely take in their original packaging.
2. Night clothes/ dressing gown/ comfortable day clothes if more than overnight stay/ slippers/pants and soft bra to go home in.
3. Toiletries/haircare items/ your own towel.
4. Small change for newspapers etc.
5. Books / magazines.
6. In case you have drains from your wound after surgery, please bring a drawstring bag big enough to hold 2 bottles (about the size of a sports water drinking bottle). This will make it easier for you to move around whilst carrying your drainage bottle(s).
